

PR3000ELCDRTL2U

Professional (Rackmount) Series

Complete Power Protection
for Mission-Critical Application

The Professional Rackmount UPS Series delivers Pure Sine Wave Output to provide advanced level of power protection to servers, telecom equipment, VOIP, industrial equipment and other mission-critical applications. Supporting Automatic Voltage Regulation (AVR) which stabilizes the incoming AC power, the UPS ensures safe power levels for the connected equipment without resorting to battery power.

With the add-on advantage of Extended Runtime (XL) battery packs, the UPS backup time can be extended to maximize workflow flexibility. The placement-wise design could be configured in either Tower (T) or Rackmount (RM) form with the attached stands and skids to make the most of your workspace.

The optional SNMP/HTTP Remote Management Capability enables remote management and control of the system through standard web browser. Together with PowerPanel® Business Edition management software, users can perform comprehensive power management including unattended-shutdown, event logging, reporting, and notifications.
